Purpose of Inspection:

This was a routine inspection while in the area.

Inspection Summary:

This site was originally inspected in July of 2005, and the operator was found to be operating without a permit. Subsequently, a SMO NOI was submitted on July 18, 2005 and a cash bond for \$2,500 was submitted.

During this inspection it was noted that much of the previous disturbance has been adequately regraded. It is assumed that these areas were also seeded since much of the vegetation observed would be considered desirable (vs. the cheatgrass that dominates the surrounding areas).

The area was free of trash and deleterious materials. There were no non-compliance issues noted.

Photos were taken to document site conditions.

Conclusions and Recommendations:

The area is in compliance at this time.
Continue to monitor this site when in the area.
